Our Products Make a Difference

Our name stands for quality and innovation in the industry. When you ask for Tresco Lighting®, you can be assured that your kitchen will be illuminated right the first time. We work with cabinet shops to configure the right system, with training and support to make your project a success. Our customer

service does not end with installation, Tresco® provides phone assistance as well as the largest field support team in the industry. We proudly stand behind our products, which allows us to assist the homeowner by ensuring their spaces are illuminated with the highest-quality lighting.

Quality Products You Can Trust

Tresco Lighting[®] partners with third party testing laboratories to insure our products are safe and reliable.

- ETL and UL are National Recognized Testing Laboratories (NRTL) as recognized by OSHA
- ETL is the largest testing laboratory worldwide
- UL is the largest testing laboratory in the USA
- Both are recognized by local inspectors throughout North America
- No mark is better than the other

Tresco[®] Products Tested and Certified for Canada and the United States

ETL or UL marks serve as proof of product compliance to Canadian and United States standards. When consumers see these marks, they know that the products in question have passed a complete and thorough set of tests and certification requirements.

All Tresco Lighting[®] systems carry UL, ETL or QPS safety certifications. In addition, a majority of our individual lighting components (lights, power supplies, and accessories) are also registered and certified by ETL and/or UL.

All Tresco Lighting[®] systems carry UL, ETL or QPS safety certifications. In addition, a majority of our individual lighting components (lights, power supplies, and accessories) are also registered and certified by ETL and/or UL.

UL's Recognized Component Mark

The UL Recognized Component Mark is used on components that are a part of larger products or systems. It is certified by UL to both Canadian and United States requirements.

* The ETL Mark is a registered trademark of Intertek.

The UL Mark and Recognized Component Mark are registered trademarks of Underwriters Laboratories Inc.
All product dimensions and specifications are subject to change without prior notice.

Layout Design Services

Are you intimidated by lumens, watts, voltage and radio frequencies? Let our Certified Lighting Designer assist you in illuminating your dream kitchen. Use our Layout Design Services to help you specify your next residential project.

LINEAR

L I G H T I N G

Illuminate your home with our slim, modular linear lighting systems, ideal for providing constant and even illumination in multiple applications. Install underneath cabinets for a bright workstation. Stop rummaging through dark cabinets to find what you're looking for and illuminate every inch of your cabinet's interior. Available in various lengths, profiles and accessories; our linear offering is the perfect addition to virtually any area in your kitchen.

PUCK

L I G H T I N G

Contrast lighting creates a dynamic space by only illuminating signature elements of your design. Our low-profile, energy-efficient Power Pockit® series puck lights are an excellent choice for open shelves, display cabinets, or accent areas. Tresco® puck lights are easy to install, dimmable and available in a variety of finishes.
